## A complete peristaltic panel mount solution for OEMs

---

Watson-Marlow DriveSure now integrates motor, mounting, our latest generation closed-loop control technology and PC software to deliver powerful performance. DriveSure is fully tested and certified, ensuring reliability in a range of applications.

INNOVATION IN FULL FLOW

**WATSON  
MARLOW** Fluid  
Technology  
Solutions

Supports cabinet ratings up to IP66

As a complete panel-mount peristaltic pump solution, DriveSure helps OEMs to reduce time-to-market and achieve competitive gain by simplifying each stage of the development process.

Panel mount pumps for 100/300/500 series and 400RXMD.

#### Key Features:

- Watson-Marlow closed-loop control technology delivers precise, cool and quiet performance
- EtherNet/IP™ and PROFINET® versions for digital network integration, control and monitoring
- Sealed mounting plate for easy installation and IP66 capability
- Integrated cover-open sensor and prime-switch input
- ADC version with 4–20 mA, 0–10 V, 2–2000 Hz and fixed speed control options

EtherNet/IP™

Downloadable PC software (WM Connect) to evaluate, configure and diagnose via USB connection

DriveSure simplifies integration into advanced distributed control systems and benefits users by improving process control, reducing operating costs and minimising downtime.

This capability enables seamless integration of vital fluid delivery and offers:

- Smart Integration: for equipment designers, eliminating the need for additional components and connections
- Improved Accuracy: for precise control of the pump resulting in more accurate flow rates
- Remote Monitoring: providing operators with greater network control
