puresu®
Single-use fluid paths
puresu technology allows you to customise your bioprocess with safe, easy-to-install assemblies.

Watson-Marlow Fluid Technology Solutions (WMFTS) are uniquely placed to offer both puresu assemblies and peristaltic pumps to meet your bioprocess fluid path requirements. Our product portfolio consisting of BioPure single-use fittings and Watson-Marlow tubing combined with third party components facilitates open architectural design suitable for bioprocess implementation.

puresu® assemblies

Controlled
Assembled in an ISO Class 7 clean room following the principles of Good Manufacturing Practice with well-defined SOPs for a consistent product.

Efficient
Supplied ready to install into your process, therefore reducing your supply chain demand.

Flexible
Our experts work with you to design an assembly suitable for your processing needs, using a combination of internal manufacturing capability and an open architecture approach.
puresu — single-use assemblies

A combination of quality components from our validated library, suitable packaging and robust manufacturing SOPs for puresu assemblies supports you with your ongoing compliance requirements.

Offering a broad range of validated components and configurations, with simple, repeatable ordering to support a continuous supply chain. Full traceability of each component is maintained throughout our assembly process and is provided as part of our detailed documentation. This ensures your tube assemblies reach you ready-to-use and that they meet the exacting requirements set for GMP processing and drug product validation.

BioPure’s puresu capability provides:

- Sterile Claim assemblies with $10^{-6}$ SAL validated according to VDmax study per ANSI/AAMI/ISO 11137
- Ultimate flexibility with quick turnaround
- Lot traceable
Simplifying the process

1 Design

Fast turnaround time of designs through to quotation.
Our product reliability and international customer support network, provides end-users with safe, reliable, effective equipment for use in the bioprocess environment.

2 Manufacture

All manufacturing of BioPure fluid path components and Watson-Marlow tubing are carried out in ISO14644-1 Class 7 clean rooms. We carry core components in stock to allow us to respond quickly and ensure that lead times are kept to a minimum.

Watson-Marlow tubing is subjected to 100% in-line inspection, plus off-line checks during every run to ensure that all Pumpsil®, Bioprene®, PureWeld® and GORE® STA-PURE® Tubing is validated to the highest standards.

3 Assembly

puresu assemblies are manufactured and packaged in an ISO14644-1 Class 7 clean room operating under ISO9001 quality standards and are supplied double-bagged.

4 Documentation

We have consolidated our documentation to ensure that you only receive what is suitable for bioprocess industry compliance. Assemblies will be provided with a certificate of conformance and an irradiation certificate. Full product certification and validation is available on request.

Collating data from our suppliers, our validation packages include:

- USP Class VI and ISO10993 compliant
- Animal Derived Component Free (ADCF)
- ISO 9001 quality system

Quality

Only components compliant with ISO and USP standards from our validated library are used in puresu assemblies ensuring consistent delivery of quality products.

Notes:
1. All measurements refer to cut tube length.
2. All applicable junctions to be secured with Oetiker clamps as per document WI077.
3. Assembly to be placed in a single inner pouch and a single outer pouch.
4. Single label to be placed on inner pouch.

6 7
Choose your tubing

In continuous daily use throughout the bioprocessing industry, Watson-Marlow tubing provides flow accuracy, ensuring process stability, cGMP compliance and final product quality.

The unimpeded fluid path and superior junction strength provided by BioPure fluid path connectors, coupled with Watson-Marlow tubing performance, reduces process variation, enhances operating techniques and increases product quality.

Our tubing portfolio offers a variety of options suitable for bioprocess purity and reliability. In addition, the right tubing for you must have the qualities needed for each part of your process.

Pumpsil®
Platinum-cured silicone tubing
- Single-use biopharm tubing
- Laser-etched lot traceability
- Excellent flow stability

PureWeld® XL
Thermoplastic elastomer tubing
- Weldable and heat sealable
- Animal Derived Component Free
- Sterilisable by gamma radiation, autoclave and ethylene oxide

Bioprene®
Precision TPE tubing
- Long pump life
- Excellent chemical compatibility
- Fully autoclavable

PureWeld® XL
Thermoplastic elastomer tubing
- Weldable and heat sealable
- Animal Derived Component Free
- Sterilisable by gamma radiation, autoclave and ethylene oxide

GORE® STA-PURE® PCS
PTFE-reinforced silicone tubing
- Pressure rated up to 7 bar (100 psi)
- Longest available tube life
- Spallation virtually eliminated

GORE® STA-PURE® PFL
PTFE-reinforced fluoroelastomer tubing
- High resistance to aggressive chemicals
- Pressure rated up to 4 bar (60 psi)
- 50 times longer life than other fluoroelastomers

BioPure Braided Hose
Platinum-cured silicone braided hose
- High pressure rating for bulk fluid transfer
- USP Class VI compliant and Animal Derived Component Free (ADCF)
- Suitable for sterilisation by autoclave and gamma radiation up to 50 kGy

BioPure Silicone Transfer Tube
- USP Class VI compliant and Animal Derived Component Free (ADCF)
- Tested in accordance with EP 3.1.9
- Lot traceability

Range of materials for every application

Resistance to chemical attack; long pumping life; economy; transparency; these are some of the factors customers consider when choosing the right validated tubing for their application. Our tubing materials are summarised below to help you make the right choice.

‡ Not for use in pumping applications

Additional tubing is available from selected third party suppliers. Please contact your sales engineer for further details.
Choose your components

BioPure Technology manufacture and supply high precision bioprocessing flow path components, including sanitary hose bars, Bio-Clamps, valves and adapters

- Permanently moulded with production lot number and size identification
- The full through bore diameter ensures a smooth transition from tube to adaptor reducing turbulence
- Suitable for sterilisation by autoclave and gamma irradiation.

### Additional components

- BioBarb™
- BioClamp®
- BioEndCap™
- BioValve™
- High purity gaskets
- Q-Clamp™
- FlatBioEndCap™
- Glass reinforced nylon
- Platinum-Cured Silicone
- Tamper evident sizes
