

314D pumphead

300 series flip-top pumpheads

Features and benefits

- Its iconic flip-top design for fast and error-free tube loading makes it the most popular choice in many medical and upstream cell culture applications
- Pumpheads can be extended to provide up to six separate channels depending on drive torque
- Three and four roller versions are most popular. Up to eight rollers is possible for lowest pulsation and greatest accuracy
- Flow rates for up to 1200 ml/min for continuous use and up to 2400 ml/min for intermittent use

314D pumphead performance

314 rapid load pumpheads (four rollers) for continuous 1.6mm wall tubing – Flow rates (ml/min)			
Tube bore (mm)	(ml/rev)	Max continuous flow (ml/min)	Max Intermittent flow (ml/min)
0.5	0.03	9.0	18
0.8	0.06	18	36
1.6	0.25	75	150
3.2	0.85	255	510
4.8	1.9	570	1140
6.4	3.0	900	1800
8.0	4.0	1200	2400

Curves conditions and conversion factors

Conditions:

- Suction curves obtained with zero output pressure.
- Pressure curves obtained with zero lift.
- Pumphead speed 100 rpm.

Conversion Factors:

- Suction pressure in Bar x 747.7 = mm Hg
- Suction pressure in Bar x 33.5 = Ft H₂O
- Back pressure in Bar x 14.5 = psi

Technical specifications

314D pumphead	
Number of channels	1
Number of rollers	4
Max. flow rate continuous	1200 ml/min
Max. flow rate intermittent	2400 ml/min
Max. continuous operating speed	400 rpm
Pump type	Cased, Panel mount
Compatible tubing bore size	0.5, 0.8, 1.6, 3.2, 4.8, 6.4, 8 mm
Compatible tubing wall thickness	1.6, 2.4 mm

Materials of construction

314D pumphead	
Bearings	Carbon steel
Pumphead body assembly	Glass filled polypropylene, Polyacrylamide-IXEF (PARA), Stainless steel
Pumphead track	Polyacrylamide-IXEF (PARA)
Pumphead roller assembly	MoS2 filled Nylon 6 (Nylatron)
Pumphead rotor assembly	Electroless nickel plated hardened steel, Glass filled Nylon

Information listed covers the complete range.

For detailed specifications of individual models/components refer to user manual or contact WMFTS representative.
